Internet II Laboratory

August 12, 2020

Objectives

- Install a XAMP/WAMP server and its components

- Integrate PHP, MySQL, jQuery and HTML5

Necessary tools:

- Visual Studio Code, Atom, Bracket editing software, etc.

- HTML, CSS and JS files, from your previous labs and classes

Description

This project consists of developing a web application (client-server) as illustrated in the figures above. The application concerns a tourism website containing 4 pages. The first page is the main page "index.html", where the user can login or signup. The user can only move to home.html if an account is already created. The home.html page contains a slideshow using JavaScript. The third page, about.html, illustrates four photos of tourist spots with their descriptions, which have jQuery effects (use the jQuery effects and events of your choice). The login, which should be logout, is but a link the allow the user to logout. Please use the photos of your choice.

Note: You should use php / sessions for login, signup and logout.
